

IMMEDIATE PRESS RELEASE

February 08, 2019

E. SMITH/HANNEGAN ROAD Intersection Improvements

Geotechnical Site Work (Expect Delays)

Whatcom County Public Works has executed a final design contract with our consultant, Transpo, and started design of the multi-lane roundabout improvement for the intersection. As part of the initial data gathering process for starting this design we are going to be doing some geotechnical exploration work at the intersection. This work, re-scheduled due to weather concerns, will require a partial closure of the intersection on **Friday, February 15, 2019** from approximately **8AM to 4PM**. This partial closure of the intersection will require lane closures in and around the intersection, as well as turning the signal to flashing red in all directions. We expect there to be **significant** delays due to the traffic volumes on both Smith and Hannegan. Public Works recommends using alternate routes on February 15, 2019 to avoid the E. Smith/Hannegan Intersection.

Note - this work will be weather dependent, and could be cancelled due to snow and ice.

In the weeks and months ahead, you will see Public Works staff on-site gathering additional information about the location that will assist in the design. Construction is currently planned for the Summer of 2021.

If you have any questions please contact Andrew Tischleder, Project Engineer, either via email or by phone. atischle@co.whatcom.wa.us or (360) 778-6224

Thank you for your patience with this inconvenience and please drive safely through the work zone.
