

Reduce, Reuse, & Recycle

Reduce waste first—keep an eye out for excessive packaging, bring an extra shopping bag to the store, or rent or borrow equipment that is needed only once.

Reuse—find a new home for unwanted items. Consider buying previously used items. Check the local “yellow pages” for stores nearest you.

Recycle—paper, bottles, cans, newspaper, and cardboard. Details are included on the inside of this brochure.

When you reduce, reuse, and/or recycle, you are helping to keep valuable resources from going into the landfill, giving them a chance for a longer life.
